

Kureha PGA LLC, Belle, WV

Openings for Fulltime Shift Production Operators

Kureha is the first chemical plant in the world to successfully develop a manufacturing process for Polyglycolic Acid in Belle, WV. Biodegradability, high mechanical strength, and high gas barrier properties are attracting interest in our product around the world. Operators perform all work activities in a team environment and must have the physical ability to lift hoses, climb ladders and stairs, work on bolt flanges in confined spaces, operate and maintain valves, plus work on other similar equipment indoors and out. Some experience preferred, but relevant experience may be accepted. High School diploma or GED is required with certificates or degrees in a related field of study receiving preference. Applicants must pass a physical function test, background check, and drug screen. Full benefits and very competitive pay are available. To apply for this position qualified applicants must email a cover letter and resume to: uccharleston@wv.gov attention: Kureha Operator. Resumes must be emailed before Thursday, May 20th, 2021.
